Languages: Portuguese (native) | English (fluent)

With 20 years as a Graphic Designer, I bridge artistic sensitivity with technical precision. For me, applying Semiotics and Gestalt principles is essential to communicate deeply through every layer of a layout. This foundation is uniquely enriched by a parallel journey as a muralist and tattoo artist, honing the ability to rapidly deliver highly creative, tailored proposals across unconventional mediums. From print and packaging to brand systems and digital products, I move fluidly between craft and concept, translating ideas into bold, enduring visual solutions.

Core Competencies & Skills

Visual Design & Craft

Typography, color theory, visual hierarchy, and layout — grounded in Gestalt and Semiotics — with digital and freehand illustration.

Illustration & Multi-Medium Art

Custom illustration, large-scale murals, and tattoo artistry — translating a single concept across unconventional physical and digital surfaces.

Brand Systems & Art Direction

Brand identity, packaging, and campaign design across print and digital, from concept to consistent, scalable visual systems.

Creative Direction & Collaboration

Client and stakeholder collaboration, translating briefs and artistic visions into cohesive concepts — leading projects end-to-end.

Tools & Digital Production

Illustration & Video

Procreate, After Effects, Premiere, CapCut.

Design & UI

Figma, Adobe Creative Suite (Photoshop, Illustrator, InDesign), Affinity Designer, Canva.

Code & AI

HTML, CSS, JavaScript, AI Coding Assistants & Image Generators.

Experience Highlights

2024 - Present | **UI/UX Designer**

Ultimatum - Law Practice Management Software

Ultimatum builds legal practice management software used across Brazil. I returned to the company, this time to lead the modernization of the platform's interface and experience — a strategic evolution centered on users' real daily routines. Here, UX research and market analysis inform every decision, and the prototypes I develop in HTML, CSS, Bootstrap, and Chart.js bring design and development closer together, ensuring every proposal is viable for implementation. I integrate AI into my workflow to accelerate research and code — freeing my focus for what matters most: refining the final product.

2022 | **Graphic Designer**

Places - Real estate marketing & design

Across social media, print, outdoor, and catalogs, I kept the visual identity consistent for multiple clients as campaigns rolled out. In a field driven by tight deadlines, an agile, organized process let me hold both aesthetic quality and consistency, delivery after delivery.

2015 - Present - **Independent Visual Artist**

Muralist & Tattoo Artist

Between large-scale **murals** and **custom tattoos**, I've kept a parallel career that sharpens how I read expectations and sense of spatial design. Turning an abstract concept into something permanent — on skin or on a wall — teaches you to listen closely and decide with precision. Those are instincts I carry into every digital project.

2013 – 2020 - **Creative Director**

Dupplamente Creative Projects

As a partner, I ran branding projects end-to-end, coordinating multidisciplinary teams assembled on demand — researchers, photographers, and print suppliers. That collaborative orchestration, paired with Design Thinking, produced deep visual identities aligned with each client's real needs. In all, I helped over 60 businesses launch or consolidate in the market.

2009 – 2012 - **UX/UI Designer**

Ultimatum - Legal practice management software

This first stint at Ultimatum put me in charge of the UI, visual identity, and design system of two digital products built from the ground up. The work proved decisive for the company's growth and opened doors to key contracts with several regional chapters of the OAB (Brazil's Bar Association).
