Languages: Portuguese (native) | English (fluent)

With 20 years in Graphic Design and UI/UX, I combine technical rigor with artistic sensitivity to create user-centered experiences, taking each project from research to interface and prototyping my own solutions in HTML, CSS, and JavaScript. My background as a muralist and tattoo artist broadens my creative range and gives me the flexibility to solve visual problems on any medium. With Design Thinking, I turn complex requirements into user journeys and implementation-ready interfaces, always in collaboration with teams and clients.

Core Competencies & Skills

Design & Fundamentals

Gestalt and Semiotics principles, visual hierarchy, typography, color theory, digital and freehand drawing.

UX/UI & Research

User research, competitive benchmarking, wireframing, and rapid prototyping.

Design-to-Code

Translating complex requirements into user journeys and flows, with functional prototyping and implementation-ready interfaces.

Processes, Management & AI

Agile methodologies, remote collaboration, project management, and AI-powered workflows (research synthesis, automation, and assisted coding).

Tools & Digital Production

Design & UI

Figma, Adobe Creative Suite (Photo-shop, Illustrator, InDesign), Affinity Designer, Canva.

Code & AI

HTML, CSS, JavaScript, AI coding assistants and image generators.

Illustration & Video

Procreate, After Effects, Premiere, CapCut.

Experience Highlights

2024 - Present | **UI/UX Designer**

Ultimatum - Law Practice Management Software

Ultimatum builds legal practice management software used across Brazil. I returned to the company, this time to lead the modernization of the platform's interface and experience — a strategic evolution centered on users' real daily routines. Here, UX research and market analysis inform every decision, and the prototypes I develop in HTML, CSS, Bootstrap, and Chart.js bring design and development closer together, ensuring every proposal is viable for implementation. I integrate AI into my workflow to accelerate research and code — freeing my focus for what matters most: refining the final product.

2022 | **Graphic Designer**

Places - Real estate marketing & design

Across social media, print, outdoor, and catalogs, I kept the visual identity consistent for multiple clients as campaigns rolled out. In a field driven by tight deadlines, an agile, organized process let me hold both aesthetic quality and consistency, delivery after delivery.

2015 - Present - **Independent Visual Artist**

Muralist & Tattoo Artist

Between large-scale **murals** and **custom tattoos**, I've kept a parallel career that sharpens how I read expectations and sense of spatial design. Turning an abstract concept into something permanent — on skin or on a wall — teaches you to listen closely and decide with precision. Those are instincts I carry into every digital project.

2013 – 2020 - **Creative Director**

Dupplamente Creative Projects

As a partner, I ran branding projects end-to-end, coordinating multidisciplinary teams assembled on demand — researchers, photographers, and print suppliers. That collaborative orchestration, paired with Design Thinking, produced deep visual identities aligned with each client's real needs. In all, I helped over 60 businesses launch or consolidate in the market.

2009 – 2012 - **UX/UI Designer**

Ultimatum - Legal practice management software

This first stint at Ultimatum put me in charge of the UI, visual identity, and design system of two digital products built from the ground up. The work proved decisive for the company's growth and opened doors to key contracts with several regional chapters of the OAB (Brazil's Bar Association).
